## I N T R O D U C T I O N

By W. W. Stockberger.

-----

DANIEL POPPLETON, of English descent, was born at Pownal, Bennington County, Vermont, March 16, 1784, son of Samuel and Caroline (Osborne) Poppleton. In 1806 he married at Poultney, Rutland County, Vermont, Nancy Wilber, born in Rhode Island, February 8, 1786, daughter of Jonathan and Nancy Wilber. Soon after their marriage they removed to Willsborough, Essex County, New York, and in 1812, traveling on horseback, they made their way westward and became the first settlers in Hartford Township, Licking County, Ohio.

At the time of settlement Hartford Township was a virgin, hardwood forest in which beech, oak, ash, maple and black-walnut trees predominated. Daniel Poppleton's first task was to fashion a crude shelter from poles and bark which served until a small area of land had been cleared for planting and a log cabin erected. Several times during this period, because of alarms of Indian raids, he retreated to Newark, the county seat, some twenty-five miles away. By degrees the forest yielded to his sturdy axe, and as the area of tillable land was thereby increased he was soon able to maintain sufficient cattle to provide oxen for the heavy work of the farm and meat for the family table. From his small flock of sheep came wool for his wife's busy spinning wheel and loom.

At the outset circumstances forced this pioneer family to become practically self-sustaining. Their food was plain and wholesome but restricted to the materials which they were able to produce by their own toil. From the surrounding forest they obtained roots and barks

which were used in dyeing the yarn spun from wool and later woven in the home into materials for clothing and for household use.

With the passing of time other settlers purchased and began the clearing of land for the future farms which eventually dotted this entire region. A small village was soon established and named Hartford for the township. Merchants opened stores stocked with goods transported by wagon from Pittsburgh and other cities, and soon manufactured goods not only supplemented the meagre equipment of the pioneer home but also displaced numerous homemade contrivances which had been used from necessity.

Daniel Poppleton was one of the more thrifty and progressive among the early settlers and, as occasion offered, increased his land holdings until at the time of his death, which occurred in June, 1852, he was owner of a large, productive, general purpose farm on which he had just completed a new frame dwelling that was still in good repair in 1938. As is true of most men of English descent, he was active in public affairs in his locality as well as in his farm enterprise. He was the first Justice of the Peace in Hartford Township, a position which he held with honor for many years. He was also active in the church work of his community and was long continued as class leader of a group which met weekly for the purpose of religious instruction.

With few exceptions the entries in his Account Book are debit items only. As very little money was then in circulation the marketing of farm products was accomplished largely through barter. The record of most of the transactions was kept in money of account. Periodically

both debtor and creditor would meet, with their respective books, to reconcile and "settle" their accounts. Since no record of creditor accounts was made by Mr. Poppleton, it is not now possible to visualize all the transactions of this old pioneer. From the records available it appears that for the entire period, 1818 to 1852, the wage of farm laborers remained fixed at 50 cents per day. Whiskey was cheap and plentiful and was obtainable at prices ranging from 50 cents per gallon in 1818 to  $37\frac{1}{2}$  cents per gallon in 1827. Salt, no less necessary than whiskey, sold for \$3.50 per bushel in 1819. Prices of farm products were subject to some fluctuation from year to year. For example, wheat ranged in price from 50 cents to \$1.25 per bushel; corn, 25 cents to 50 cents; oats, 23 cents to 25 cents; potatoes,  $31\frac{1}{4}$  cents to 50 cents; pork, 2 to 8 cents per pound; and flour 2 to  $2\frac{1}{2}$  cents per pound.

Careful inspection of the fragmentary records which follow may reveal something of interest concerning pioneer farming in that part of central Ohio to which Daniel Poppleton brought his family when it was little more than a wilderness, but which he lived to see develop into a land of prosperous farms and safe and comfortable homes.
